A Note for Parents

Dear Parent,

You already know the feeling - another episode, another 10 minutes, another "just one more video." It's not that screens are evil. It's that our children need something else to reach for, too.

This workbook gives you 30 days of ready-made, no-searching-required activities - most needing nothing more than a pencil and a few household items. Some days your child works alone for 10 minutes. Some days you'll do it together. Every day builds a real skill: writing readiness, early letters and numbers, thinking skills, and creativity.

You don't need to be a teacher. Just show up for 15-20 minutes a day. We've done the planning - you just need to be present.

- *Team Kitab Kit*

Parent tip

There's no wrong way to color outside the lines here. The goal is engagement, not perfection.

How to Use This Workbook

1

Pick a quiet 15-20 min window

Same time each day if possible - after breakfast works well.

2

Read today's activity together

Let your child look at the page first before starting.

3

Do it at their pace

It's okay if they don't finish, or do it differently.

4

Tick the tracker

Celebrate the small win, every day.

Parent tip

Missed a day? Just pick up where you left off - the 30 days don't need to be consecutive.
